

Astro-Tech, Celestron, and the night sky . . . meant for each other.

Some things are just meant to go together: peanut butter and jelly; apple pie and ice cream; Astro-Tech, Celestron, and the night sky. Here's another of those combos: a Celestron CG-5 go-to mount and an Astro-Tech AT8IN 8" f/4 Imaging Newtonian. The background photo shows the kind of image the \$449 AT8IN can produce in the hands of a talented hobbyist. Ready to take your own images? We have your scope.

AT8IN image of the Horsehead and Flame nebulae in HaRGB by astronomy hobbyist David Rosenthal (<http://pbase.com/djrlx90>).
